

# Pump<sup>TM</sup> of the Month

## Bakken Zone, Coleville

### Conditions:

For nearly 10 years, this well was producing from the notoriously difficult Bakken zone at a rate of 200 m<sup>3</sup> per day. The pump was pulled and replaced with a customer property 100TP1200, which had previously been down-hole for 2000 days in another well. A five year pump run already!

**Pump Model:** 60 TP 1300 Elastomer 194, VH 40 HP 5.6 Drivehead

**Duration of Pump Run:** 9 years, 7 months and 28 days

**Bringing Solutions to the Surface for 16 years.**
