

PumpTM of the Month

Excellence Powers Growth

Kudu Lloydminster is breaking ground on a larger 18,000 sq ft shop, while the Calgary manufacturing facility just expanded by 36 per cent to 42,000 sq ft. Our manufacturing processes are modeled on those of the world's most successful automakers. It's called 'Lean Excellence'. It allows Kudu to consistently deliver high quality products and to quickly improve upon them as new applications emerge such as CBM applications and artificial lift using coiled tubing.

Bringing Solutions to the Surface for 16 years.

Contact Kudu for a tour of our Calgary facility.
