

PumpTM of the Month

Talisman, Handsworth Field

Conditions:

Nearly 6 years ago, a new well was outfitted from surface to sump Kudu equipment.

The light oil elastomer of the PC pump endured brutalities of high aromatics and high H₂S content typical of this area.

Another reason to get pumped about Kudu.

Pump Model: 300TP1200 Light Oil Elastomer

Duration of Pump Run: 6 years, 11 months

Bringing Solutions to the Surface for 16 years.
